Software Engineer with 2+ years in backend and embedded finance. University of Toronto CS graduate.

EXPERIENCE

Fiserv, Embedded Finance: *Software Engineer* Toronto, ON | Oct 2025 - Present

- Built a configurable user onboarding flow for Fiserv's multi-tenant embedded-finance platform, enabling Paycom's **200K-user rollout** and 3 upcoming company launches by decoupling account and card creation.
- Architected async card reissue infrastructure for Fiserv's embedded-finance platform, replacing synchronous flows with event-driven services and cutting average reissue endpoint latency from **~8s to ~3s (63%)**.
- Built core transaction APIs in **Python** on AWS, integrating RabbitMQ, MySQL, API gateways, event-driven microservices, and persistence layers to enable high-volume processing of **\$20M+** in recurring wage flows.

MPAC: *Software Engineer* Pickering, ON | May 2025 - Oct 2025

- Engineered a full-stack system for generating & delivering property tax assessments using Kafka, MySQL, **Python** (Sanic), **TypeScript** (React), and AWS SNS, processing **5M+ properties for 14M+ Canadians**.
- Migrated in-house user authentication system to AWS Cognito, enabling a scalable cloud-based identity management system for **1,000+ organizations**, simplifying federation, MFA, and token-based access.
- Built a Python schema-migration service driven by Excel-based mapping rules to transform S3-hosted JSON into legacy schemas, preserving compatibility for 30+ downstream systems across 100+ organizations.

Bally's Interactive: *Software Engineer (Promoted from Co-op)* Toronto, ON | Aug 2023 - Jan 2025

- Spearheaded homepage category carousel development with Java/Kotlin/Android SDK, improving first-touch, and first-impression user experience, accelerating navigation speed by 30% for **10M+ users in 7 countries**.
- Developed Bash scripts and Dockerfiles to automate Android APK builds within GCP, Jenkins CI/CD pipelines, leveraging Kubernetes environments to streamline QA build deliveries, achieving 99% build success rate.

Engineers Without Borders: *Software Engineer Intern* Toronto, ON | Aug 2022 - Dec 2022

- Led 5 engineers in the development of a cross-platform (iOS/Android) mobile application using React Native, and **TypeScript**, empowering teachers in the education of global disparities in clean water access.
- Built a robust RESTful backend using **Python**, Django, and PostgreSQL to integrate third-party APIs and automate database operations, increasing backend reliability by raising unit test coverage to 90%.

LinkingVentures: *Software Engineer Intern* Toronto, ON | May 2022 - Sep 2022

- Shipped a scalable subscription billing system using **Python**, **TypeScript**, and Stripe APIs, implementing secure checkout, recurring billing, and webhooks, significantly reducing payment processing times by 40%.

EDUCATION

University of Toronto (St. George) Toronto, ON | Sep 2020 - Apr 2025

Honors B.S. Computer Science Specialist, Statistics Minor

PROJECTS

Velo (React Native, Python, FastAPI, OpenAI, AWS): Built cross-platform (iOS/Android) calendar app with STT/TTS voice enabled OpenAI-powered assistant for scheduling. Launching 09/01/2026 Google Play/App Store. [Public repo](#)

Frobot (React, TypeScript, Python, OpenAI, AWS Lambda/API Gateway): Shipped OpenAI-powered chatbot with personality modes (supportive/funny/honest), prompt engineering, real-time chat UI, deployed via serverless AWS. [Try it](#)

SKILLS & CERTIFICATIONS

Certifications: [AWS Certified Cloud Practitioner](#) (Completed, 2025), [AWS Certified AI Practitioner](#) (Completed, 2025)

Skills: Python, TypeScript, SQL, FastAPI, Django, Flask, React, AWS, Docker, Kubernetes, RabbitMQ, Redis, GCP
