Software Engineer with 2+ years building backend and payment infrastructure. University of Toronto CS graduate.

EXPERIENCE

Fiserv: *Software Engineer* Toronto, ON | *Oct 2025 - Present*

- Built a scalable onboarding system for a multi-tenant payments platform, supporting **batches of 10K users** for Paycom Vault's phased **300K-user rollout** and 3 upcoming launches by decoupling card and account creation.
- Architected an asynchronous card reissue system using event-driven systems and background workers, reducing average API latency from **8s to 3s (63%)** by moving operations off the synchronous request path.
- Reduced physical card activation latency from **4s to 1.8s (55%)** by offloading 3 network calls to background jobs and built cron-based reconciliation to close virtual cards left open by incomplete workflows.
- Built core transaction APIs in **Python** (Flask), integrating AWS, RabbitMQ, MySQL, API gateways, event-driven microservices, and persistence layers to enable high-volume processing of **$20M+** in recurring wage flows.
- Driving migration of **Uber Pro** & **Lyft Direct** payout/debit programs from third-party issuer and ledger platforms to Fiserv's native stack, targeting **~$3M** in annual savings by retiring Payfare systems.

MPAC: *Software Engineer* Pickering, ON | *May 2025 - Oct 2025*

- Engineered a full-stack system for generating & delivering property tax assessments using Kafka, MySQL, **Python** (Sanic), TypeScript (React), and AWS SNS, processing **5M+ properties for 14M+ Canadians.**
- Migrated in-house user authentication system to AWS Cognito, enabling a scalable cloud-based identity management system for **1,000+ organizations**, simplifying federation, MFA, and token-based access.
- Built a Python schema-migration service driven by Excel-based mapping rules to transform S3-hosted JSON into legacy schemas, preserving compatibility for 30+ downstream systems across 100+ organizations.

Bally's Interactive: *Software Engineer (Promoted from Co-op)* Toronto, ON | *Aug 2023 - Jan 2025*

- Spearheaded homepage category carousel development with Java/Kotlin/Android SDK, improving first-touch, and first-impression user experience, accelerating navigation speed by 30% for **10M+ users in 7 countries.**

Engineers Without Borders: *Software Engineer Intern* Toronto, ON | *Aug 2022 - Dec 2022*

- Led 5 engineers building a cross-platform education app with React Native, TypeScript, **Python**, Django, and PostgreSQL, empowering teachers educate students on global disparities in clean water access.

LinkingVentures: *Software Engineer Intern* Toronto, ON | *May 2022 - Sep 2022*

- Shipped a scalable subscription billing system using **Python**, TypeScript, and Stripe APIs, implementing secure checkout, recurring billing, and webhooks, significantly reducing payment processing times by 40%.

EDUCATION

University of Toronto (St. George) Toronto, ON | *Sep 2020 - Apr 2025*
Honors B.S. Computer Science Specialist, Statistics Minor

PROJECTS

Velo *(React Native, Python, FastAPI, OpenAI, AWS)*: Built cross-platform (iOS/Android) calendar app with STT/TTS voice enabled OpenAI-powered assistant for scheduling. Launching 12/01/2026 Google Play/App Store. Public repo
Frobot *(React, TypeScript, Python, OpenAI, AWS Lambda/API Gateway)*: Shipped OpenAI-powered chatbot with personality modes (supportive/funny/honest), prompt engineering, real-time chat UI, deployed via serverless AWS. Try it

SKILLS & CERTIFICATIONS

Certifications: AWS Certified Cloud Practitioner (Completed, 2025), AWS Certified AI Practitioner (Completed, 2025)
Skills: Python, TypeScript, SQL, FastAPI, Django, Flask, React, AWS, Docker, Kubernetes, RabbitMQ, Redis, GCP
